

Position: Forest Analyst

Location: Macon, Georgia

FRC Team(s): Valuation & Technical Services

Forest Resource Consultants, Inc. (FRC) is the second largest forest consulting firm in the United States, and we recently celebrated our 50th anniversary. With over 100 foresters, specialists, and support staff, FRC is headquartered in Macon, Georgia with twelve additional field offices. These are located in Atlanta, Lumpkin, Madison, Rome, and Waycross, Georgia; Diboll, Jasper, Nacogdoches, and Silsbee, Texas; Picayune and Quitman, Mississippi; and Arkadelphia, Arkansas. FRC has experienced a consistent track record of growth over the past 20 years.

FRC's management, valuation, technical, and real estate teams are focused on providing value to clients, both large and small. We serve a broad spectrum of clients, including family forest owners, investment partnerships, timberland management organizations, investment banking firms, etc.

FRC is seeking a highly motivated and talented professional to join the Valuation and Technical Services Teams in Macon, GA. The Valuation Services Team completes a wide variety of valuation projects on timberland ownerships both large and small; these projects total over two million acres annually. Some examples include real estate and timber appraisals, acquisition and disposition analysis, and estate asset valuation and division. The Technical Services Team provides forest mapping, modeling, and data management services on millions of acres annually. This team of technical foresters and specialists delivers the high-quality data and analyses needed to help clients make well-informed forest management decisions

Data management and intelligence serve as the foundation of FRC's forest management, real estate, and valuation projects. The Valuation and Technical (Tech) Teams collaborate regularly on a variety of assignments. The Forest Analyst position will participate and support FRC's data management, editing, and review procedures and will be involved in projects from inception to completion. These data processes are imperative in helping FRC deliver quality reports to our clients that are accurate and dependable.

Requirements:

- Bachelor's or Master's degree in Forestry or Natural Resources.
- Strong analytical skills needed for data review, forensics, and transformation.
- Strong knowledge of standard computer software packages like MS Word, Excel, Access.
- Desire to learn data conversion and migration techniques between various database platforms.
- Desire to learn database management tools like SQL Server.
- Desire to learn programming associated with Remsoft's Woodstock Linear Programming Model.
- Desire to learn Esri's ArcGIS Online and Enterprise setup, management, and support.
- Aptitude for problem solving.
- Must possess good verbal and written communication skills.
- Must possess good interpersonal skills and be able to work well with others in team production situations.
- 2+ years of experience preferred.

Job Responsibilities:

- Produce high quality work products in an efficient manner.
- Assist in the completion of the Valuation and Tech Teams' projects.
- Facilitate collaboration between the Valuation and Tech Services Teams.
- Utilize data forensic processes to maintain the data quality required to deliver accurate results.
- Assist in the development and maintenance of data using FRC forest inventory systems.
- Develop and maintain new and existing property data and associated GIS layers to FRC standards.
- Provide assistance in forest modeling projects by developing an understanding of Remsoft's Woodstock Linear Programming Model.
- Utilize ArcGIS and associated tools including relational databases such as SQL Server for technical forestry projects.
- Maintain Quality Assurance/Quality Control for existing datasets.
- Participate in reviews of current technology and innovations in the data management and geo-spatial arena.
- Assist with other special projects as requested.
- Promote a positive image of FRC with clients, associates, contractors, and the public.

Salary will be commensurate with skills and experience. Competitive benefits package includes health, life and disability insurance, 401(k) plan, optional dental insurance, paid vacation, and holidays.

Furnish the following by Tuesday, August 31, 2021:

- Cover letter explaining why you are qualified for this position and how you meet the requirements
- Resume
- Names, daytime phone numbers, and email addresses of three professional references, one being a current or recent supervisor
